### Hepatitis B vaccination camp concludes

AT News · 15:38, 11 May 2015 | Updated 10:02, 12 May 2015 · 10563 views · 1 min read

Over 65 media persons with their spouses joined in a fresh Hepatitis B vaccination camp organized by Dispur Hospital at Guwahati Press Club on 11 May 2015. The camp started at 11 am and continued till 1 pm.

According to the experts, the Hepatitis B virus affects the human liver and may cause liver cancer (</taxonomy/term/2066>) and liver cirrhosis. It can cause both acute and chronic infections. It is transmitted through blood and infected bodily fluids. Statistics reveal that over 750,000 people die of hepatitis B each year in the world.

The second (and final) dose of the Hepatitis B vaccine will be given on 11 June 2015 at the press club starting from 11 am (till 1 pm), which is advised necessary for completion of the vaccination process.
