In its bid to bridge the industry-academia gap, an industrial talk on “Installation, Maintenance and Protection of Transformers” was organised by the department of Electrical and Electronics Engineering, Assam [Don Bosco](#) University on Monday which evoked an encouraging response.

Former Deputy General Manager of AEGCL Karuna Sarma was the speaker of the event, where a total of 50 students attended the talk. In his deliberation, Sarma stressed the importance of the transformer as the nerve of the electric power systems.

He dwelt at length the types of transformer, its design, its different components and accessories. Further, he also discussed about the installation of the transformer, the site preparation and the testing and commissioning of the transformers. The session ended with interaction of the resource person with the students.
