This is a good news for our state. The gas based Lakwa thermal power station under Assam power generation corporation Ltd, located at Maibella of Sivasagar district has now improved its generation capacity. With improvement of gas supply position the production of the this power station is improved. This station will produce 37.5 MW more with installation of waste heat turbine, which also minimise the production cost .

The supply of gas to the station is stream lined . Station purchase the its gas from GAIL. Hope, with this improvement in power generation, the people of Assam will get some relief from the power crisis.
